

Daily Work Report – 16th October 2025

Today's Work Summary

- Discussed the game development project, focusing on upcoming module integrations, UI enhancements, and database structuring to support a multi-game platform.
 - Planned the next phase of feature enhancements and reviewed existing game logic for performance optimization.
 - Updated and refined attendance project APIs based on frontend feedback, ensuring smooth data synchronization and improved response handling.
 - Developed a new API endpoint to fetch active employee counts, categorized by department and branch, enhancing reporting accuracy and dashboard insights.
-

Planned Work for Tomorrow – 17th October 2025

1. API Integrations & Updates

- Perform necessary API updates based on frontend integration feedback.
- Debug and refine existing APIs to improve consistency, error handling, and overall system performance.

2. Additional Enhancements

- Work on further API improvements related to leave management, attendance tracking, and content management modules.
 - Conduct thorough testing to ensure all integrated APIs function smoothly across different modules.
-

Sincerely,
Anoop K
Python Developer
Ziya Academy LLP
